100% organic

100% natural

Made in Spain

HPP Technology

Natural Cold Process®

Natural Cold Process® The most Natural Process.

The Naturae® extraction method with Cold Process technology allows us to keep intact all the nutrients and healthy compounds of our aloe vera, as well as the vitamins and taste of the fruit juices and infusions we use. As a result, the best of each ingredient is maximized and oxidation minimized, resulting in healthier, tastier and more environmentally friendly refreshing beverages.

HPP Technology No more chemical preservatives.

The innovative HPP technology is the best alternative to pasteurization and to the use of chemical preservatives. To eliminate pathogens, pre-packaged foods are subjected to high pressure for short periods of time. High pressures reduce microbiological flora as effectively as heat treatments, but cold processing does not result in alterations to the healthy properties of the food, and the addition of chemical preservatives is not required.

This technology is also very versatile and can be applied to practically any type of food.

Naturae®.

We control the whole process. From the field to the point of sale.

The Aloe Vera we use comes **from our own organic crops in Andalusia**. Besides, we work closely with local partners who supply us with the **best fruit juices, medicinal and aromatic plants and the most natural organic cane sugar**.

Therefore, we minimize the handling of our raw material, just treating it with the **most advanced technology**. Thanks to the innovative Natural Cold Process® and HPP systems we produce **fresher and healthier foods**, with all their nutrients and natural properties and without chemical preservatives or pasteurization processes.

That is what differentiates us: **we control the production, processing and delivery**, offering that extra touch of safety, quality and flavor so characteristic of our brand.

Aloe Vera Specialists.

Used since the beginning of time, the Aloe Vera is a food like no other, since it provides an **enormous amount of benefits for our health**.

This natural treasure offers us **multiple healthy properties**, helping people of all ages to acquire a better quality of life.

Improve your days
with aloe!

- ✓ We only use fresh Aloe Vera leaves from our own organic crops in Andalusia.
- ✓ We use only natural and organic ingredients.

Regulator of digestive disorders
[peptic ulcer, gastroenteritis, inflammatory colitis, digestive problems due to stress, anxiety, etc.].

It stimulates the absorption of nutrients
facilitating their assimilation and has anti-inflammatory and antioxidant effects.

Regulator of the immune system
[indicated for people who suffer stress, tiredness or anxiety that lead to a lowering of the defenses].

Organic aloe vera juices.

The aloe vera juices
Naturae® allow you to
take advantage of all its
benefits **for your organism's
health.**

Take them **every morning**
and start strengthening
your immune system,
**improving your digestion
and keeping your intestinal
flora healthy.**
